

The main title should be in the font

Almendra Display

the size should be 100pt in one of the chosen shades below. Incorporate the UK element by using the font 'Almarante' rotated slightly to fit into the empty space of the 'e' in Faire. Make sure the title is centered on every page, including the app. The title should also be a viable button option to allow users to get back to the homepage.

home • about us • events • tickets • guidelines • shop

The main menu bar should consist of six categories in THIS EXACT ORDER! They should appear on every page and should be used as buttons to navigate each page.

The circles purely decorative. Make sure they are all in lowercase to fit the aesthetic.

Each body of text of title should include a rectangular background with a corner radius of 30. The transparency should range from 30% to 70% reduction, dependant upon the illustrations and information. Add multiple rectangles of text ontop of one another to create layering features.

All boxes should be in the shade #FFF9F5 to match the colours chosen for the account logo.

TRF
UK

This logo should be advertised in the top left corner of every page with the slogan "Download Our APP today!". The font should be the same as the rest of the page but the size should only be 15pt. The logo should also work as a button to download or navigate to the app.

Example Title

ALL FONT OTHER THEN THE TITLE
should be in the font

'Almarante'

in one of the potential shades shown below. The title should be a clean 100pt and all menus a size 35pt. Any text should be a 22pt with the exception of titles and important information, which should be 30pt.

These icons should be used to provide hyper-link 'buttons' to the Festivals social media pages. each icon is for indivual pages, including Discord, X & Facebook. All links should be situated in the about us page, alongside the footer on every page. This section should also include a gallery feature that links to the festivals Instagram account. All these links should open in a new tab or in the apps case, it should directly open the other apps.
